## Buyer Contact Information

Name: \_\_\_\_\_

Email: \_\_\_\_\_

Phone: \_\_\_\_\_

Address: \_\_\_\_\_

## **Pickup Location (Check the Box)**

### **PRIEST RIVER PICKUP (preferred):**

Friday April 17th, 2026

9:00 am to 4:00 pm

388 Bodie Canyon Road

Priest River, ID 83856

### **COEUR D'ALENE PICKUP:**

Friday, April 17th, 2026

4:00 pm - 6:00 pm

635 N 18th St.

Coeur d'Alene, ID 83814

Planting available 3,000 tree minimum, call Jake for pricing. Trees sold by box or bundle.

## **8 Cubic Inch Plugs - 15 Seedlings per Bundle - 255 Seedlings per Box**

Sold As	1-16 Bundles	1-3 Boxes	4-6 Boxes	7-9 Boxes	10+ Boxes
Tree Count	15 - 240	255 - 765	1,020 - 1,530	1,785 - 2,295	2,550+
Price per Seedling	\$1.50	\$1.10	\$0.95	\$0.85	\$0.76
Engelmann Spruce					
Western Larch					
White Pine					
Ponderosa Pine					
Douglas-fir					
Western Redcedar					

Subtotal Due: \_\_\_\_\_

## **BIG 15 Cubic Inch Plugs - 8 Seedlings per Bundle - 128 Seedlings per Box**

Sold As	1-15 Bundles	1-8 Boxes	9+ Boxes
Tree Count	8 - 120	128 - 1,024	1,152+
Price per Seedling	\$1.99	\$1.50	\$1.25
Western Larch			
White Pine			
Ponderosa Pine			

Subtotal Due: \_\_\_\_\_

### **Signature below confirms the following terms:**

- 1.) Full payment due at time of order
- 2.) No refunds on trees not picked up

*JDFM is partnering with IFOA  
to provide quality seedlings  
to family forest landowners.

Signature: \_\_\_\_\_

Due: \_\_\_\_\_

6% Sales Tax: \_\_\_\_\_

Total Due: \_\_\_\_\_

### **Please return signed form with payment to:**

JD Forest Management

P.O. Box 55

Priest River, ID 83856

## Western Larch Species Overview

*Western larch (or tamarack) is the most widely and successfully planted conifer in north Idaho. It is the "bread and butter" of reforestation in the region.*

### Tree Planting Properties of Western Larch

#### **1. Excellent Survival**

- Western larch generally has the best planting survival of any species in the area.
- Larch is ecologically adapted to be the first species that comes back after a wildfire. A disturbed logging site provides similar conditions of bare soil and plenty of sunlight – just what larch needs to thrive!

#### **2. Fast Early Growth**

- Larch thrives in full sunlight and has by far the fastest early growth of any native conifer.
- Seedlings are commonly **6+ feet tall** within 2-5 years.

#### **3. Browse Resistance**

- Deer and elk browse is a major tree planting challenge.
- Western larch loses its needles in the fall so is less palatable to deer in March and April when they are hungry. Douglas-fir and ponderosa pine are both much more susceptible to browse than larch.

#### **4. Disease Resistance & Broad Soil Suitability**

- Western larch is resistant to root rot diseases that cause significant problems with Douglas-fir and grand fir. Reforesting root-diseased stands with western larch is often a good plan.
- Larch is suitable for all local soil types except for dry and rocky ponderosa pine sites.

#### **5. Strong Wood Quality**

- Larch is sold together with Douglas-fir as the Fir-Larch species mix which has the highest wood strength ratings and generally the second highest log prices after cedar.

#### **6. Aesthetic Value**

- Larch turns a bright gold in the fall enhancing aesthetics for your timberland or even around your home or cabin.
